

Raghuram Gnanasekaran

Lead Cloud Engineer - Azure, AWS, Kubernetes

Singapore | raghuramrgn@gmail.com

Summary

- With over **11** years of experience in **cloud engineering**, I specialize in streamlining complex cloud architectures and driving operational efficiency across hybrid environments, using Kubernetes, Terraform, and modern **DevOps technologies**.
- With a **Master's in Software Engineering** specializing in cloud computing from the **National University of Singapore** and four AWS certifications, including AWS Solution Architect Professional, I specialize in deploying Java services, utilizing Kinesis and Kafka for data processing, and leveraging **ECS and EKS** for containerized service delivery.
- I am passionate about fostering **continuous engineering improvement**, mentoring teams, and driving metrics-based performance. My **leadership** extends across remote teams, where I ensure seamless workflows and productivity.
- As a member of a leadership pod, I provide **strategic guidance**, delivering enterprise solutions across hybrid cloud environments. I focus on containerization, PaaS evaluation, and Blue/Green deployment strategies.
- Notable achievements include leading the **GitLab, Nexus, Harbor, Octopus, Hashicorp Vault setup** for a global bank, managing cloud migrations with tools like **Git, Kubernetes, Ansible, and Terraform**, all while maintaining strict data privacy standards.

Work experience - 11 years

Julius Bär - Wealth Management-Singapore

Jun 2022 - Present

Senior Technical Lead - HCL Singapore

- Led GitLab installation and **reduced infrastructure costs by 40%**, improving developer productivity by **60%**.
- **Automated** the entire infrastructure provisioning using Terraform and configuration via Ansible, reducing manual processes reducing **manual processes by 95%** and ensuring consistency.
- Streamlined **Kubernetes** management by developing an **Operator Layer for Backstage**, enhancing developer productivity and operational efficiency.
- Delivered & Supported **Backstage, Octopus, and Harbor solutions**, managing configurations at scale, and building robust infrastructure for a global bank.
- Key member of the Technical Excellence team, integrating **GitLab with NX build systems**, ensuring optimal performance and compatibility with existing workflows for the whole Bank.
- Championed CI pipeline development for Infra components, driving **consistency and efficiency** in provisioning across the infrastructure.

DBS Bank Singapore

Jun 2018 - Jun 2022

Senior Associate C2E - 4 years

- Proficient in automating and maintaining **Kubernetes-based** cloud systems across multi-cloud environments (on-prem and cloud) using tools like **Ansible, Helm, and Terraform** to ensure scalable infrastructure.
- Automated **Kubernetes deployments** align with governance policies within the bank, maintaining compliance and influencing downstream applications for an enhanced customer experience.
- Delivered **Kafka on Kubernetes**, increasing data processing efficiency by 50% and supporting \$12M in customer clickstream data seamlessly across AWS and on-prem environments

Mentorica-Media-Corp

Dec 2017 - May 2018

Associate(Senior Developer) - 0.5 years

- Established an automated CI/CD pipeline, maximizing resource utilization and achieving a 70% reduction in **AWS** resource usage.
- Collaborated with the CTO to implement the backend for an Analytics Dashboard, leveraging sales data for improved insights.
- Enhanced **Kubernetes** deployment strategies, improving automated delivery and release processes.

- Optimized **infrastructure management**, ensuring efficient resource allocation and streamlined operations.

National University of Singapore

May 2017 - Nov2017

Research Assistant 0.5 years

- Worked as a Research **Assistant at NUS**, developing a React JS student portal **part-time** while pursuing a master's degree.
- Established CI/CD and peer review processes, ensuring strong adherence to **conventional commits in Git**.
- Enhanced the developer culture by implementing incremental improvements, resulting in the delivery of higher-quality products.

Nokia Networks R&D

Jan 2014 - Jan 2017

Sr Software Engineer (Lead Developer) - 3 Years

- Engineered and upheld high-performance networking solutions within the **private Nokia cloud**, resulting in a 40% enhancement in data transfer speeds and overall user experience.
- Spearheaded the implementation of **G.fast Technology** to improve L2 Layer Network bandwidth by 10x, contributing to groundbreaking work as part of the pioneer team at **Bell Labs in Antwerp, Belgium**.

Honeywell International

Dec 2012 - Jul 2013

Associate (Developer)- 0.5 years

- Automated build pipelines using on-prem Jenkins, streamlining the development and deployment processes.
- Spearheaded the development of a prototype logged for the World Invention Disclosure System, showcasing innovation and technological advancements.

4x AWS Certifications

- **AWS Certified Solutions Architect Professional**
- AWS Certified Solutions Architect **Associate**
- AWS Certified Developer Associate
- AWS Certified Cloud Practitioner

Skills

Network	Cloud Infrastructure
IGMP, DHCP, VLAN, OSPF, BGP, LAN, eVPN, TCP/IP, DNS	Azure Monitor , AWS Kubernetes Service, Azure DevOps, , AWS Route 53, Azure Defender Suite, Azure OMS/Application Insights, Global Traffic Manager, Guardrails, Amazon ECS, AWS Lambda
Solution Architecture	Development
Gitlab Setup, Kafka Setup , Solutioning, Data Pipelines Design & Integration Architecture, Setup API Gateways	Microservice development, Spring Boot, Maven, Java, React, Vue, Fast API, Python

Education

National University of Singapore

2017 - 2018

Institute of system science

Thiagarajar College of Engineering, Madurai

2009 - 2013

Department of Information Technology
